

# TAP2412 – Bolsena Single Lever (Chrome)

Key:	Description:	APX size (mm):	Base material	Colour:	QTY:
A1	Aerator case	24 x 13	Brass	Chrome	1
A2	Aerator	20 x 14	Plastic	White/Light grey	1
A3	Washer	2.5 x 23	Rubber	Black	1
B1	Handle	102 x 40 x 45	Mazak	Chrome	1
B2	Indices	9 x 7	Plastic	Red/Blue	1
B3	Grub screw	M5 x 8	Steel	Silver	1
B4	Decorative shroud	40 x 13	Plastic	Chrome	1
B5	Cartridge bush	12 x 37	Brass	Brass	1
B6	Cartridge	56 x 35	Plastic	Cream	1
C1	Upper body	67 x 41	Brass	Chrome	1
C2	PTFE spacer	38 x 1.3	PTFE	White	1
C3	O-ring	35 x 3	Rubber	Black	2
C4	Spout section	240 x 41	Brass	Chrome	1
C5	PTFE spacer	38 x 1.3	PTFE	White	1
C6	Base plinth	44.5 x 5.5	Brass	Chrome	1
C7	Upper seal	41 x 3	Rubber	Black	1
D1	Fixing studs	M6 x 70	Steel	Silver	2
D2	Lower seal	40 x 3	Rubber	Black	1
D3	Metal horseshoe	48.5 x 2.5	Steel	Silver	1
D4	Fixing nuts	13 x 10 AF	Brass	Brass	2
E1	Hot flexi tail	½" BSP Male x M10 x 300	Stainless braided hose	Silver	1
E2	Cold flexi tail	½" BSP Male x M10 x 300	Stainless braided hose	Silver	1
E3	Olive	17 x 6	Brass	Brass	2
E4	Nut	11 x 24 AF	Steel	Silver	2

# TAP2412 – Bolsena Single Lever (Chrome)

## General Advice:

- These instructions are intended as a guide only, if you are in any doubt you should seek the advice of a qualified professional.
- Take care not to mark finished parts with screwdrivers or other tools.
- Use a pair of rubber gloves to get a better grip on decorative hand tight parts.
- Ensure all parts are reassembled tightly.
- After maintenance test that all assemblies are water tight and function correctly.
- Always isolate the hot and cold water supplies before starting any maintenance, once isolated you should drain any residual water from your system.

## To replace the valve:

1. Tilt the handle (B1) into the on position.
2. Remove the dust cap (B2) with a fingernail or small screwdriver.
3. Loosen grub screw (B3) using a 2.5mm A/F Allen key.
4. Pull the handle (B1) horizontally away from the tap.
5. Unscrew by hand the decorative cover (B4)
6. Hold the body of the tap (C1) firmly. Using an adjustable spanner unscrew the valve lock nut (B5).
7. Pull the old valve cartridge (B6) away from the tap.
8. Ensure that the valve chamber (C1) is clean of dirt and grit.
9. Place the new valve (B6) in the chamber (C1), ensuring the locators on the base of valve (B6) align with the recesses in the chamber of the tap (C1).
10. Reassemble the tap in the reverse order.
11. If replacing the valve it would be prudent to clean the aerator also.

## To replace the spout O-rings:

1. Disconnect tap entirely from all fittings listed above.
2. Unscrew base plinth (C6) and pull vertically away from spout body (C4).
3. Pull spout body (C4) vertically away from tap body (C1).
4. Remove the old O-rings (C3) using a small screwdriver or similar. Note the orientation of the O-rings for reassembly.
5. If worn, remove the white PTFE spacers (C2 & C5).
6. Ensure the inside of the spout (A4) and the body (C6) is clean of dirt and grit.
7. If required locate the new white PTFE spacers (C2 & C5).
8. Carefully locate the new O-rings (C3) onto the body (C1).
9. Grease the O-rings thoroughly with silicone or alternative similar grease.
10. Reassemble the tap in the reverse order.

## To clean the aerator:

1. Holding the spout (C4) using an adjustable or 22mm spanner unscrew the aerator case (A1)
2. Push the aerator (A2) out from the centre of the aerator case (A1)
3. Using a cloth wipe away any debris from the meshed screens of the aerator (A2)
4. Run warm water through the aerator (A2) held in the backwards direction (inwards from dark grey side)
5. If the aerator (A2) is blocked due to Limescale deposits, we recommend soaking the aerator in vinegar to loosen the scale, then repeat steps 3 and 4.
6. Reassemble the tap in the reverse order.
